Steel Frame of New Science, Mathematics, Library Center at St. Sebastian's School

Steel Frame of New Science, Mathematics, Library Center at St. Sebastian's School

Erland Tops Off New Science, Mathematics, Library Center for St. Sebastian's School

Burlington, Massachusetts – On Friday, July 8th, Erland secured the final steel beam onto the new 32,000 square foot Science, Math, Library Center for St. Sebastian's School in Needham, Massachusetts – completing the building's frame. Erland is teaming with Robert Olsen + Associates of Boston on this new construction and renovation project.

When completed in early 2012, the new two-story Science, Math, Library Center – built as an addition to the existing main building – will feature eight math classrooms; two biology labs; and two science classrooms on the first floor. The second floor will contain two chemistry labs; two physics labs; a math/science computer room; a seminar room; and a reading room. In addition, the new building will have a large rotunda with high-end finishes that will be used for physics lessons. As part of this project, Erland will renovate a section of the existing main building to connect the buildings together and perform life safety upgrades to the Church on campus.

St. Sebastian's School was founded in 1941 by William Cardinal O'Connell, Archbishop of Boston. In keeping with the spirit of the age, the School was named for Sebastian, the soldier - saint. St. Sebastian continues to be a role model for the school's students. His values of integrity, leadership, courage, and faith have never been more vital. Committed to pursuing truth through faith and reason, the 360 boys enrolled in grades seven through twelve dare to share freely and fully of themselves as they grow in body, mind, and spirit

Erland Construction, with offices in Burlington, Massachusetts and East Windsor, Connecticut, is the region's leading open shop construction management, program management, design/build, and general contracting firm. The company has the specialized expertise for new construction, additions, and renovations in major market sectors including academic, residential, commercial, and healthcare.
